

I have a wife of 49 years and 3 children all raised, educated with families of their own, and 3 grandsons. The huge part of our retirement lives are spent with our children babysitting, vacationing and just general visits. I have one daughter in Marin, another, who has two sons, in Sacramento, and our son is in Fairfield.

I retired ten years ago from Snap on Tool Corp. as an industrial sales Rep. with a territory from the Golden Gate to the Oregon border along the 101; a great scenic geography. My customers were schools, municipalities and large corporations. My few largest customer being PG&E, the geothermal steam fields at the Geysers and Chevron Refinery in Richmond. I worked for Snap-on for 30 years.

In retirement, I love to workout at the Airport Club 4-5 days a week. I spend as much time with the family as possible. If time, I golf twice a week. I also volunteer making calls to seniors for Catholic Charities, feeding homeless at my church (St. John's) for St. Vincent de Paul. Finally, I coach men with substance abuse issues at the Redwood Gospel Mission in Santa Rosa.
